

dnp Holo Screen Accessories

dnp Holo Screen Accessories is a series of well-designed and easy-to-install solutions for installation of the acrylic version of the dnp Holo Screen in shop windows, shop-in-shop areas, and other POS environments.

The accessories programme includes two different solutions – a wire kit and a floor stand. Both kits are easy to install and made of high quality materials with an aesthetic finish, which matches the interior design of a high-end concept store.

Floor stand

Designed in aluminium, the elegant floor stand fits into even the most exclusive shop environments.

Wire kit

The wire kit allows the Holo Screen to be hung from the ceiling, apparently floating in mid air.

Floor stand

The floor stand can be set up quickly at any location. It is also ideal if the screen has to be mobile or if the ceiling does not allow mounting of projector and wires. The stand takes up very little floor space. And the clean high-tech aluminium look is designed to fit into modern instore interiors without drawing attention away from the image. The floor stand allows you to adjust the vertical position of the screen according to the average height of the viewers – a feature that makes it well suited for universal use in all applications and markets.

Wire kit

The wire kit is designed for situations where the end user wants to create the illusion of a flying image. You only need to attach 2 or 4 thin wires to the transparent screen, and the image will seem to be suspended in mid air. The kit comes with flexible mounts, which can be used for both ceiling and wall mounting situations.

Accessory	Type		Floor stand for 40" Holo Screen 7080	Floor stand for 60" Holo Screen 7081	Wire Kit for 40" Holo Screen 7082	Wire Kit for 60" Holo Screen 7082	10 m extra wire 7083
Floor stand
